

**COMMUNICATION DEVICE HAVING
SELECTABLE VOICE MESSAGE TRANSMISSION**

5

ABSTRACT

A communication device (100) and a method (400), enabling a user (202) of the communication device (100) to respond to a caller during a call with speech without speaking during the call, are provided. The communication device (100) stores selectable messages (204, 310, 312), and transmits a selected stored message during the call as a speech to the caller such that the caller hears a spoken message.
